implementation and monitoring

The Community Plan action plan sets out the key activities that need to take place over the next three years in order to make progress and achieve our long-term objectives.

Some of these activities will be driven by specific partnerships but in each case a responsible agency has been listed in the relevant section to ensure accountability is built into the plan. The Warwick Partnership will monitor overall progress on the action plan and review it publicly mid-term.

Behind this action plan are numerous detailed 'live' plans, to which the themed groups/partnerships and agencies are working and on which they regularly report progress to the Warwick Partnership Board.

The next review

Warwick District 2020 is the area's second community plan.

A review of progress in implementing Warwick District 2020 and an assessment of new challenges facing the district will take place at the beginning of 2007. This will set the wheels in motion for the development of the new action plan 2008 – 2011.
