

Locality Profile January 2011

Locality Name: Kenilworth
District: Warwick District

The Kenilworth locality comprises the wards of Abbey, St John's, Park Hill, a small area of Stoneleigh and the village of Burton Green. It includes the 3 County Council Electoral Divisions of Kenilworth held by 3 County Councillors. 9 District Councillors represent the town, and the Town Council is made up of 16 Councillors. Aside from the town centre and residential areas, the locality is rural and sparsely populated. Part of the University of Warwick campus falls into the north-east part of the locality. Kenilworth Castle is a popular tourist attraction.

* Mosaic Group representation in this locality compared to Warwickshire as a whole. An index of 100 would equate to equal proportions in-line with the County.

Mosaic is a classification that groups citizens in terms of their socio-demographics, lifestyles, culture and behaviour to provide a comprehensive view of citizens and their needs. Mosaic can also provide an indication of the degree of diversity across the locality.

Deprivation¹⁴

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

More information can be found on the Department for Communities & Local Government website:

Summary & Key Issues:

Kenilworth town is made up of an old town, dating back to the Middle Ages, and the new town that mainly grew from the arrival of the railway in 1844. The two are separated by Abbey Fields park, which also contains a leisure centre and swimming pool. A recreational centre at Castle Farm serves the town, and the Meadows Community Sports Centre, based in the grounds of Kenilworth School, offers indoor and outdoor sports facilities. Other leisure facilities include two amateur theatres, a youth centre, cricket, rugby, tennis, skate park, squash & croquet clubs. Kenilworth is perhaps best known for Kenilworth Castle, although other significant local landmarks include Kenilworth Clock, Abbey Fields park and St Nicholas' Church.

Although there are no large employers in the locality, the town centre offers a range of business and employment opportunities for local people. The ongoing regeneration of the town centre includes an improved traffic system, with traffic calming measures and the redevelopment of the Talisman Square shopping area. The cornerstone of this redevelopment has been the opening of a Waitrose supermarket, which has been used to attract other businesses including Holiday Inn and Starbucks, and development proposals. The redevelopment of the town centre will provide a wider range of facilities, job opportunities and better access for the local residents.

The town has good transport links - Birmingham International Airport, the M6, M42 and M40 are within 10 miles. Although the town's railway station was closed in the 1960s there has been a successful campaign to build a new one, scheduled to open in 2013. There is a regular bus service to Coventry and Leamington railway stations, and Warwick Parkway railway station is less than 10 minutes' drive away on the A46 bypass. Outlying parts of Kenilworth including the village of Burton Green fall on the proposed route of High Speed Rail 2, a service that is designed to connect central London with Birmingham, plus other destinations in the north of England. The Connect2 project aims to regenerate the disused Berkeswell to Kenilworth railway line into a leisure route for walkers, horse riders and cyclists. Funding has been secured to link the town to the Warwick University campus, and also to provide a bridge across the A429.

Public services in Kenilworth include police and fire stations, a library and a Warwickshire County Council one-stop shop. The Town Council owns Odibourne Allotment Gardens and rents Spring Lane Allotments from Warwick District Council. These sites are rented to Kenilworth Allotments Tenants Association on a fully maintaining and repairing lease. Both traditional and farmers' markets are held regularly at Abbey End. Other social facilities include a disabled person's forum and there are three Local Nature Reserves within the locality. The Kenilworth Community Forum encourages local residents to come together to consider issues of importance to the town. High Speed Rail is an issue causing great concern to the town. The Forum has a small pot of grant funding, which it uses to bring benefit to the community. The Abbey End cinema, based in the new Youth and Community Centre, was launched thanks to a Forum grant, and local skateboarders have seen their skate park improved thanks to funding and support from the Forum. The Kenilworth History Group have been funded to assist them in marking a leisure trail of important sites in the town, and the Helping Hands group, a long-running voluntary group supporting learning disabled adults, have been able to buy new equipment for their Friday night club. Community Safety is high on the priority list for the Community Forum, and significant work is undertaken in the town to reduce speeding through the Community Speedwatch scheme, staffed entirely by local volunteers who are supported by the Police.

The population of this locality has an older profile than Warwickshire as a whole and has the seventh highest proportion of people of retirement age of all the localities. The Mosaic socio-demographic classification shows that 'Successful professionals living in suburban or semi-rural homes' are nearly twice as prevalent as in the County as a whole, and that 'Wealthy people living in the most sought after neighbourhoods' are nearly three times as prevalent.

Generally, the locality has a prosperous profile it has nearly twice the average percentage of people employed in professional occupations as well as an above-average percentage employed as managers and senior officials. The skill level of the adult population is high; one in three is educated to university degree level or above (the highest proportion of any locality in the County) and the achievement of school pupils at GCSE is 18 percentage points above the County average. The percentages of low income households, workless benefit claimants and social rented housing are all low.

This is not to say that there are not people in need. In such a prosperous area it might be possible to overlook the minority who are at a disadvantage. In addition to the small numbers of workless, pensioners claiming Pension Credit and children eligible for free school meals, there are also sizeable minorities in poor health or with limiting long term illnesses. The rural area to the west and north of the town is identified as among the 10% most deprived nationally in terms of barriers to housing and services.

Kenilworth has one of the lowest rates of recorded crime and incidents of antisocial behaviour in the County, both are approximately one-half of that experienced in the County. Kenilworth also experiences the lowest level of violent crime offences of any locality in the County, 2.7 offences per 1,000 of the population, compared to 9.8 offences across Warwickshire as a whole. The locality also has the second lowest rates of road injuries in the whole County, just 0.9 per 1,000 of the population, compared to 2.9 per 1,000 countywide.

Unsurprisingly then, Kenilworth locality has the fourth highest proportion of residents satisfied with their neighbourhood as a place to live, in the whole County. Their three top areas requiring improvement are all likely to have been addressed to some degree by the regeneration work in the town centre: a new youth centre has been provided, as well as improved shopping facilities and some changes to traffic flows. Other concerns and issues for Kenilworth residents include the expansion of Coventry airport and the need for a new railway station.

Locality Profile January 2011

Locality Name: North Leamington

District: Warwick District

The North Leamington Locality has the largest population of all the localities in the District & comprises the wards of Milverton, Clarendon, Manor & Crown and the County Council Electoral Divisions of Milverton & Leamington North. The locality covers an area of approx 4 square miles. The locality is primarily residential except for the main town centre & the Campion Hills & Newbold Comyn areas. However, there is a considerable mix of housing ranging from new town centre flats to post-war local authority stock to large regency style properties.

N Young people renting flats in high density social housing	442	3.2%	205
O Families in low-rise social housing with high levels of benefit need	280	2.0%	80

* Mosaic Group representation in this locality compared to Warwickshire as a whole. An index of 100 would equate to equal proportions in-line with the County.

Mosaic is a classification that groups citizens in terms of their socio-demographics, lifestyles, culture and behaviour to provide a comprehensive view of citizens and their needs. Mosaic can also provide an indication of the degree of diversity across the locality.

Deprivation¹⁴**Index of Multiple Deprivation 2007 Super-Output Area* Ranks**

Super Output Area (SOA)*	Index of Multiple Deprivation	Income	Employment	Health & Disability	Education Skills & Training	Barriers to Housing and Services	Crime & Disorder	Living Environment

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

<http://www.communities.gov.uk/publications/communities/indicesdeprivation07>

Summary & Key Issues:

The North Leamington Locality covers the main town centre shopping district and the residential suburban areas of Milverton and Lillington. The main sites of interest within the North Leamington locality include the historic Royal Pump Rooms, Victoria Park and Jephson Gardens, which is famed for its floral displays and fountains. The Spa Centre nearby, which has undergone significant refurbishment during 2010, hosts a variety of concerts and theatre productions. The locality includes The Parade, the main street on which the main town centre area is focused. It includes a good selection of shops and restaurants, including high street chains and the Royal Priors covered shopping centre. There are also a significant number of independently run shops, bars and restaurants in the surrounding streets. The continual retail development within the locality and the wide variety of shops on offer has helped make Leamington Spa one of the most attractive shopping destinations in the Midlands.

There are a range of public services on offer within the locality including a children's centre, two libraries, a police and fire station and a recycling centre at Prince's Drive. The main campus of Warwickshire College is also in the locality. The new Warwickshire Justice Centre on Newbold Terrace is now open. This is the first centre in the country where all the Justice Agencies, including Crown Courts, are located. It is also linked to the existing Police building in Hamilton Terrace. Regular bus services provide good travel links to neighbouring towns and Warwick University. Local sports facilities in North Leamington include the Newbold Comyn leisure centre, swimming pool and municipal golf course, in addition to the Leamington Rugby, Tennis, Hockey, Bowls and Cricket clubs which are situated in the locality.

North Leamington School (NLS) moved into new 'state-of-the-art' buildings, with capacity for 1500 students, back in September 2009. Built within the green belt at a total cost of £32 million, the new school incorporates a mass of environmentally-friendly features and state-of-the-art facilities. Importantly, these facilities, from the sports centre and the floodlit all-weather surfaces to the 400-seat theatre, also provide a much-needed resource for the local community, enabling NLS to operate effectively as an 'Extended School'.

Community Safety is high on the priority list for the Community Forum and there have been numerous initiatives between the safer neighbourhood team and local neighbourhood watch targeting speeding, theft from cars and anti social behaviour.

In terms of its population age profile, North Leamington locality has one of the lowest proportions of children out of all the localities across the County; only 15% of the total population are aged under 16. This contributes to the locality having a relatively low household size of 2.17 people, compared with 2.37 for Warwickshire as a whole. The locality also has a fairly diverse mix of different ethnic groups. One in eight residents were recorded as being of non-white British ethnic origin at the time of the 2001 Census, which ranks as the fifth highest proportion among the 30 localities in the County.

The occupational structure of North Leamington's working age population is quite different to that of Warwickshire, with proportionally more people employed as managers, senior officials and professionals, and proportionally less employed as machine operatives or working in elementary occupations. North Leamington has the second highest proportion of its working age population (19.1%) employed in professional occupations among the 30 localities.

North Leamington locality has the third highest total recorded crime rate in Warwickshire with 90 crimes per 1,000 population compared with the County figure of 63. This is most likely due to the locality encompassing the main part of the town centre. The locality's criminal damage rate is relatively high, 17 offences per 1,000 population, compared to 11 across the whole of Warwickshire. Incidents of anti-social behaviour are also relatively high with 65 incidents per 1,000 of the population, ranking it as the 6th highest across the County.

In terms of education, the proportion of resident pupils in North Leamington who achieved 5 or more A*-C GCSE grades (including English and Maths) was just below the Warwickshire figure, 53.6% compared with 56.9%. Youth service membership amongst 11-25 year olds in the locality was below the County average, 9.8% compared with 11.5%. The proportion of 16-18 year olds in North Leamington recorded as not being in formal education, employment or training was high relative to the County figure; 5.3% were classed as NEET compared with 4.5% across Warwickshire.

The population of North Leamington is particularly well qualified. The locality has the fifth lowest proportion of 16-74 year old residents with no qualifications and the second highest proportion with the equivalent of a university degree or higher. More than a third of 16-74 year olds hold a qualification at this level compared with only a fifth of people across Warwickshire. The Mosaic socio-demographic classification shows that 'Young well-educated city dwellers' are heavily over represented compared with the County profile, six times as prevalent as in the County as a whole.

According to the 2007 Index of Multiple Deprivation, two thirds of the SOAs in North Leamington are ranked within the 50% least deprived SOAs in England. However, there is one Super-Output Areas (SOA) in the locality ranked within the top 10-20% most deprived SOAs nationally. This illustrates the inequality which exists within the locality at a very local level. The Lillington East SOA experiences deprivation linked to employment and education, skills and training. Deprivation linked to crime and disorder is also a particular issue in and around the town centre with three SOAs ranked within the top 20% most deprived SOAs nationally on this measure. Three SOAs also feature within the top 10-20% in terms of barriers to housing and access to services.

Locality Profile January 2011

Locality Name: South Leamington

District: Warwick District

The South Leamington locality comprises the wards & County Council Electoral Divisions of Willes & Brunswick. The Area is represented by 2 County Councillors, 6 District Councillors & 16 Town Councillors covering both North & South Leamington. The locality borders the railway station area & the River Leam to the North & stretches southwards upto the small residential town of Whitnash. It includes the ward areas Brunswick Ward known as the 'Old Town' area of South Leamington & Willes Ward that includes the Sydenham housing & industrial estate.

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

More information can be found on the Department for Communities & Local Government website:

<http://www.communities.gov.uk/publications/communities/indicesdeprivation07>

Summary & Key Issues:

Royal Leamington Spa formerly known as Leamington Priors, expansion began following the popularisation of the medicinal qualities of its water in 1784. The South Leamington locality includes Leamington Rehabilitation Hospital and St. Margaret's Church are also located in the area. In terms of transport, there are regular Flexibus services to Leamington Spa and the area has easy access to the M40 motorway. The South Leamington Community Forum area borders the railway station premises and the River Leam to the North and encompasses the majority of the Old Town area and the large Sydenham housing estate. The Old Town has been the focus of a number of government funded regeneration initiatives including the development of the Spencer's Yard Cultural Quarter. A further proposed project is the redevelopment of the Old Ford Foundry site, railway station and Stagecoach bus depot in order to create a new 'gateway' to Leamington from the M40. The proposals include new homes, offices, hotels, car parking for the railway station and environmental improvements. In terms of transport links, the area is well served by local buses to neighbouring towns, Coventry and Warwick University. Leamington Spa train station on the mainline Chiltern line also provides good links to Coventry, Birmingham and London Marylebone.

South Leamington has a highest concentration of black and ethnic minority communities in the District. The area benefits from a wide range of community centres that cater for South Leamington's diverse communities including Hindu, Sikh, African-Caribbean and Portuguese communities. Brunswick Healthy Living Centre provides a range of health projects and facilities for the whole of South Leamington. The Syndi Centre based, in the heart of the Sydenham Housing estate, provides a range of much needed services to the local communities from access to advice and information and local events. Local businesses in the Old Town are represented on the town committees and other organisations by the Old Town Business Association (OTBA). The main concerns of residents near to the River Leam are linked to flooding, as the area suffered its worst flood for nearly a decade in 2007.

South Leamington has a population age profile which is quite different to that of Warwickshire. The locality has lower proportions of children and those of retirement age, meaning that three-quarters (74%) of residents are of working age, compared to 61% across the County. The locality also has a rich mix of different ethnic groups. More than one fifth (21%) of the locality's population were recorded as being of non-white British ethnic origin at the time of the 2001 Census, which ranks as the highest proportion among the 30 localities in the County.

More than 22% of households in the South Leamington live in socially rented accommodation, which is the second highest proportion across all the localities in Warwickshire. Also, almost one in three households (31%) in this area do not have access to a private car or van, again the second highest proportion in the County.

The South Leamington & Whitnash locality's unemployment rate of 3.3%, as measured by the proportion of the working age population claiming Job-Seekers Allowance, was well above the County rate of 2.6%. Although South Leamington has a relatively low proportion of people of retirement age or over, it has the second highest proportion of pension credit claimants, 31% taking up this benefit, compared to the Warwickshire claimant rate of 19%.

The occupational profile of the working age population in the locality is fairly similar to that of the County, although there are a lower proportion of people employed as managers and senior officials. Instead, slightly higher proportions are employed within the sales and customer service, plant and machine operation, and elementary occupations.

The total recorded crime rate in the locality is above the Warwickshire figure, and is the seventh highest across all the localities. The rate of total recorded crime is 76 per 1,000 population, compared to a rate of 63 across the County. The rate of antisocial behaviour incidents are also relatively high (5th highest in the County), and unsurprisingly the level of crime is the issue that most residents believe needs improving in their local area.

The proportion of resident pupils in South Leamington who achieved 5 or more A*-C GCSE grades (including English and Maths) was over eight percentage points below the Warwickshire figure, 49% compared with 57%. This area also had the second highest proportion of pupils in Warwickshire eligible for free school meals, 22% compared with 11% across the County. This provides an indication of the proportion of school children in the area from families on low incomes and deprived backgrounds.

In the South Leamington locality, the proportion of 16-18 year olds recorded as not being in formal education, employment or training was high relative to the County figure, 8% compared to 4.5%.

According to the 2007 Index of Multiple Deprivation, there are two Super-Output Areas (SOAs) in the locality ranked within the top 20-30% most deprived SOAs nationally. These are both in the Brunswick area of South Leamington. Deprivation linked to education, skills and training appears to be a particular issue in the South Leamington area, with six SOAs ranked within the top 30% most deprived SOAs in England on this measure.

The Mosaic socio-demographic classification shows that 'young well-educated city dwellers' are very heavily over represented in the locality compared with the County profile, this is explained by the significant numbers of Warwick University students that are known to live in the area.

Locality Name: Warwick

District: Warwick District

The Warwick locality comprises the wards & County Council Electoral Divisions of Warwick North, Warwick South & Warwick West held by 3 County Councillors, 9 District Councillors & 15 Town Councillors. The locality covers an area of approximately 8 square miles encompassing the County town of Warwick, its surrounding area and the grounds of Warwick Castle, one of the UK's top tourist attractions. The locality area stretches southwards from the Woodloes estate to the Longbridge M40 junction & borders Leamington Spa and Whitnash to the east.

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

Summary & Key Issues:

Warwick began as a Saxon settlement and by the time of the Domesday Book in 1086 became a fair sized town. Warwick Locality encompasses the medieval County town of Warwick and its immediate surrounding area. Tourism plays a key role in the local economy as the locality features a range of historic landmarks such as the world famous Warwick Castle, the old Lord Leycester military hospital, and the Collegiate Church of St Mary which dominates the local skyline. The town centre is renowned for its historic architecture and contains a mixture of Tudor and 17th century buildings.

There are also a range of attractive parks and gardens and a race course which hosts several televised meets each year. The town regularly features as one of the UK's most visited tourist destinations attracting large numbers of people from around the world. The locality has a wide range of businesses and good opportunities for employment. In recent years, several high profile national and international companies have set-up large office complexes in and around Warwick, notably IBM and National Grid. The locality also includes a full accident and emergency hospital, a large technology park and the Shires Retail Park on the fringes of Leamington Spa. Warwick is also the administrative headquarters of the County Council. The town itself has a range of public services that include the Shire Hall One-Stop Shop, a Children's Centre and Nursery, Library, and Police and Fire Stations.

Transport services include the County Links Bus Network and a train station on the main Chiltern line which links Warwick to Birmingham and London. The A46 trunk road provides good access to the busy Longbridge junction on the M40. This junction is currently the subject of a major project aimed at relieving congestion on the traffic island. In the town centre, a new bus station is under construction, and is set to be completed by December 2008. The new development will make bus travel easier and more comfortable for passengers and will improve the efficiency of the bus operations in and around the locality.

Warwick offers a range leisure, recreational and community facilities that include St. Nicholas Park Sports Centre, Coten End Youth Centre and a variety of sport and social clubs. Community Facilities include the Packmores Community Centre based on the Packmores Estate in West Warwick offering a range of advice for local residents. In North Warwick, the GAP community project has been providing a range of social facilities and support for the needs of the local community over the last 10 years whilst Spinney Hill has its own action group. In Warwick South the local community benefit from a multi use community centre know as Warwick Gates Community which as well as offer a wide range of community facilities there is also a place of worship. The town also hosts successful annual Word and Folk Festivals.

The composition of Warwick Locality's population is fairly representative of that of the County in terms of age and gender, with the most notable difference being the higher proportion of the population that are non-white British. One in ten residents (10%) are from a Black and Minority Ethnic group compared with 7% of residents across the County as a whole.

Benefit claimant rates are generally in line with the County average, but the locality does have a high proportion of residents employed in professional occupations and who have an NVQ Level 4 (degree level) or higher qualification. The Mosaic dataset also shows that 'Couples and young singles in small modern starter homes' are twice as prevalent as in the County as a whole; and the area is typically underrepresented within those groups characterised by social deprivation, low incomes and low aspiration.

However, according to the Index of Multiple Deprivation, there is one small, isolated pocket of deprivation within the locality on the Packmores housing estate. This Super-Output Area (SOA) suffers deprivation particularly linked to education, skills and training and is ranked within the top 10% most deprived SOAs nationally on this measure. Other parts of the locality rank as deprived in terms of geographical access to services and issues relating to access to housing such as affordability. This is likely to be due to high prices relative to incomes in these areas. Over half of the locality's Super-Output Areas are ranked within the top 30% most deprived SOAs in England in this respect.

Consultation findings showed that traffic congestion was viewed as the key priority for improvement by residents within the locality; although this may have been partly addressed by the recent improvements to the Longbridge island. Activities for teenagers and road and pavement repairs were also thought to be in need of improvement by residents, although generally 85% of respondents were satisfied with their local area as a place to live. . The Warwick Locality is a typically affluent area with a number of large employers and excellent transport links. The tourism industry plays a key role in the local economy and the area includes a range of distinct communities and issues.

Locality Profile January 2011

Locality Name: Warwick Rural - West

District: Warwick District

The locality of Warwick Rural West comprises the wards of Bishops Tachbrook, Budbrooke, Lapworth & Leek Wootton. It includes the County Council Electoral Divisions of Bishops Tachbrook & Leek Wootton with 2 County Councillors. It has 5 District Councillors & 11 Parish/Joint Parish Councils in the locality. The locality covers an area of approximately 51 square miles, containing a mix of villages, hamlets and farms in an area which encircles the towns of Warwick & Leamington Spa. An essentially rural area, its northern fringes stretch to border Solihull.

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

More information can be found on the Department for Communities & Local Government website:

<http://www.communities.gov.uk/publications/communities/indicesdeprivation07>

Summary & Key Issues:

The Warwick Rural West locality includes Hatton Country World, the Warwickshire Police Head Quarters at Leek Wootton, and the Warwickshire Golf and Sports Club. There are also a number of village halls used for a range of community activities.

The M40 is adjacent to the locality, providing good links to the motorway network. Warwick Parkway train station on the Chiltern line provides good links with Birmingham and London Marylebone. There are also train stations on the same line at Hatton and Lapworth. There is a limited bus service to some parts of the locality.

The locality is served by a children's centre.

The Warwick Rural West locality encourages local residents to come together to consider issues of importance to the town. Speeding and inconsiderate parking provide ongoing frustrations for local residents. The Forum has a small pot of grant funding, which it uses to bring benefit to the community. Traffic schemes that reduce speeding through the villages are favoured in some parts of the locality, with forum funding being used to purchase and rotate vehicles activated speed signs across the area.

The Warwick Rural West locality's population profile is similar to that of the County, with 61% of the population being of working age, and 20% being of retirement age. The area appears to have a high proportion of healthy residents; only 13% report having a limiting long-term illness and only 6% report being in not good health. Both of these measures are the lowest for any locality in the County.

The locality has the highest proportion of its working age population employed as managers and senior officials, coupled with the lowest proportions employed as process, plant and machine operatives, and working in elementary occupations. The locality also has the fourth highest proportion of its residents aged 16-74 with qualifications equivalent to a university degree or higher.

The locality has a relatively low level of total recorded crime, with 44 crimes per 1,000 population compared with the County figure of 63. Furthermore, the locality experiences some of the lowest levels of violent crime and criminal damage offences of any locality in the County. Levels of antisocial behaviour are also low, 22 incidents per 1,000 population compares well with the County average of 48 incidents per 1,000 population.

Consultation results showed that activities for teenagers was the most important issue residents felt was in need of improvement in their local area. This could be attributed to the fact that the youth service membership rate in Warwick Rural West is relatively low. Not surprisingly, for a rural area, public transport was also identified as a key issue in need of improvement.

The road injury rate per 1,000 resident population is the second highest of all 30 localities. This is likely to be due to a stretch of the busy A46 running through the locality coupled with the large number of rural roads relative to the resident population. The rural location of the locality also explains why the area has the lowest proportion of households with no car in the whole County, just 6%.

Warwick Rural West locality is a typically affluent area. This is reflected on the Index of Multiple Deprivation where all of the locality's Super-Output Areas (SOAs) are ranked within the 50% least deprived SOAs nationally. However, all nine SOAs feature in the top 20% most deprived SOAs nationally in terms of barriers to housing and services, of which two are ranked in the top 1%. This is a probable reflection of the rural nature of the locality and the impact this has on accessing key local services. Issues relating to access to housing, including affordability will also be contributing factors. The Mosaic socio-demographic classification supports this, with 'Resident of isolated rural communities' over represented compared with the County profile. Other over represented groups include 'Wealthy people living in the most sought after neighbourhoods' and 'Successful professionals living in suburbia or semi-rural homes'.

Locality Profile January 2011

Locality Name: Warwick Rural - East

District: Warwick District

The locality of Warwick Rural East comprises the wards of Cubbington, Radford Semele and most of Stoneleigh. It comprises the County Council Electoral Division of Cubbington, with 1 County Councillor & 4 District Councillors. There are 8 Parish/Joint Parish Councils representing the area. The locality covers an area of approx 31 square miles. with a mix of villages, hamlets and farms. The locality is rural, with Cubbington and Radford Semele being the largest settlements. There are a significant number of historic buildings and sites in the locality.

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

More information can be found on the Department for Communities & Local Government website:

<http://www.communities.gov.uk/publications/communities/indicesdeprivation07>

Summary & Key Issues:

Sites of interest within the Warwick Rural East locality include Stoneleigh Abbey and Stoneleigh Agricultural Centre, home to the Royal Show. The European Headquarters of AGCO who produce agricultural equipment are based at Stareton.

The road network around the locality is very busy, with the A46 and A45 to one side, and the A452 into Leamington, leading to the M40 on the other. Bus services are limited. Coventry Airport on the northern fringe of the forum area provides non-passenger flights. A number of villages fall on the proposed route of High Speed Rail 2, a service that is designed to connect central London with Birmingham, plus other destinations in the north of England.

Local community initiatives include the Canal side Community Food project and Farm in Radford Semele.

50 houses in Cubbington were affected during the 2007 floods, and the Cubbington Flood Forum has been formed to ensure progress in alleviating the flooding is maintained.

The Warwick Rural East locality encourages local residents to come together to consider issues of importance to the town. High Speed Rail is an issue causing great concern to the locality, as well as the potential impact of house-building schemes. Speeding and inconsiderate parking also provide ongoing frustrations for local residents. The Forum has a small pot of grant funding, which it uses to bring benefit to the community. In order to address and identified lack of activities for young people, the locality has commissioned a local youth service provider, Hybrid Arts, to deliver targeted youth activities, with an ability to respond to antisocial behavior issues as they occur. The service is a universal service for all local young people, but it will work alongside local agencies to tackle some of the antisocial behavior reports as well, thus providing benefit to the wider community.

The Warwick Rural East locality's population profile shows some differences to the County profile, with the second lowest proportion of under 16's in the County (15%). The area also has a relatively high proportion of non-white residents, 11%, compared to 7% across the County as a whole. The area appears to have a good proportion of healthy residents; only 14% report having a limiting long-term illness and only 6% report being in not good health. Both of these measures are amongst the lowest four localities anywhere in the County.

The locality has a high proportion of its working age population employed as managers and senior officials, coupled with low proportions employed as process, plant and machine operatives, and working in elementary occupations. The locality also has the fifth highest proportion of its residents aged 16-74 with qualifications equivalent to a university degree or higher.

The locality experiences relatively low levels of crime (43 per 1,000 population) and incidents of antisocial behaviour (21 per 1,000 population). Most types of crime remain below the County average, although incidents of vehicle crime are slightly above the Warwickshire average.

Consultation results showed that activities for teenagers, public transport and road and pavement repairs were the three most important issues residents felt was in need of improvement in their local area. However, 96% reported they were satisfied with their local area as a place to live, the highest of any locality in the County.

Warwick Rural East locality is a typically affluent area. This is reflected on the Index of Multiple Deprivation where all of the locality's Super-Output Areas (SOAs) are ranked within the 50% least deprived SOAs nationally. However, three SOAs feature in the top 10% most deprived SOAs nationally in terms of barriers to housing and services, of which two are ranked in the top 1%. This is a probable reflection of the rural nature of the locality and the impact this has on accessing key local services. Issues relating to access to housing, including affordability will also be contributing factors.

The Mosaic socio-demographic classification indicates that the locality has an overrepresentation of the most affluent groups, with 'Successful professionals living in suburbia or semi-rural homes' and 'Wealthy people living in the most sought after neighbourhoods' being most prevalent compared to the County overall.

Locality Profile January 2011

Locality Name: Whitnash

District: Warwick District

The Whitnash locality comprises the County Council Electoral Division Whitnash, represented by 1 County Councillor and 3 District Councillors. Whitnash Town Council is made up of 15 Councillors. The locality covers an area of approximately 2 square miles and has recently been made its own locality area, having been separated from South Leamington. Whitnash is a small, largely residential town. It has its own Town Plan, which identifies parking and dog fouling/littering to be the main issues of concern to residents.

Violent Crime (2009/10)	47	4.7	5,241	9.8
Criminal Damage (2009/10)	68	6.8	5,977	11.2
Anti-Social Behaviour Incidents (2009/10)	255	25.6	25,640	47.9

* All crime rates are calculated on a per 1,000 population basis except domestic burglary which is calculated on a per 1,000 household basis.

Road Safety¹²

	Locality		Warwickshire	
	No.	%	No.	%
Total Road Injuries (2009)	7	-	1,566	-
Road Injury Rate (per 1,000 population)	-	0.7	-	2.9

Socio-demographic classification*¹³

	Households	%	Index
A Residents of isolated rural communities	386	10.0%	212
B Residents of small and mid-sized towns with strong local roots	54	1.4%	12
C Wealthy people in the most sought after neighbourhoods	246	6.4%	141
D Successful professionals living in suburban or semi-rural homes	1,382	35.8%	234
E Middle income families living in moderate suburban semis	665	17.2%	149
F Couples with young children in comfortable modern housing	33	0.9%	10
G Young, well-educated city dwellers	399	10.3%	227
H Couples and young singles in small modern starter homes	36	0.9%	16

Residents' Perceptions¹¹

	Locality %	Warwickshire %
% of residents satisfied with their neighbourhood as a place to live (2008)	88.6%	82.9%
% of people who volunteer at least once a month (2008)	22.0%	26.0%
Top three issues that residents feel need improving in their local area (2008)	Activities for Teenagers Road and Pavement Repairs Affordable Decent Housing	

Health

	Locality		Warwickshire	
	No.	%	No.	%
Limiting Long Term Illness ²	1,245	16.0%	84,795	16.8%
Not in Good Health ²	579	7.4%	41,117	8.1%
Disability Living Allowance ⁴	350	3.5%	23,120	4.3%

Socio-demographic classification*

	Households	%	Index
I Lower income workers in urban terraces in often diverse areas	248	6.4%	142
J Owner occupiers in older-style housing in ex-industrial areas	93	2.4%	31
K Residents with sufficient incomes in right-to-buy social houses	170	4.4%	67
L Active elderly people living in pleasant retirement locations	80	2.1%	42
M Elderly people reliant on state support	10	0.3%	5
N Young people renting flats in high density social housing	59	1.5%	98
O Families in low-rise social housing with high levels of benefit need	0	0.0%	0

* Mosaic Group representation in this locality compared to Warwickshire as a whole. An index of 100 would equate to equal proportions in-line with the County.

Mosaic is a classification that groups citizens in terms of their socio-demographics, lifestyles, culture and behaviour to provide a comprehensive view of citizens and their needs. Mosaic can also provide an indication of the degree of diversity across the locality.

Deprivation¹⁴

Index of Multiple Deprivation 2007 Super-Output Area* Ranks

Super Output Area (SOA)*	Index of Multiple Deprivation	Income	Employment	Health & Disability	Education Skills & Training	Housing and Services	Barriers to Crime & Disorder	Living Environment
Whitnash North	14,093	10,697	12,557	14,813	9,968	14,401	18,352	26,135
Whitnash East & Millponds	23,215	23,002	20,584	20,868	15,438	11,150	26,954	30,237
Whitnash West	25,717	18,363	23,516	24,563	22,469	20,550	27,200	23,622
Whitnash St Margarets	26,593	21,583	25,265	23,992	19,159	20,617	26,131	25,410
Whitnash South	29,475	27,463	30,623	28,138	19,183	14,084	27,747	30,375

*Super Output Areas (SOAs) are a geographic hierarchy designed by the Office for National Statistics to improve the reporting of small area statistics in England and Wales. SOAs have a minimum population of 1,000 and a mean population of 1,500.

Key:

	Ranked within top 10% most deprived areas nationally
	Ranked within top 10-20% most deprived areas nationally
	Ranked within top 20-30% most deprived areas nationally

The Index of Multiple Deprivation 2007 (IMD 2007) is a Lower layer Super Output Area (LSOA) measure of multiple deprivation. The IMD is made up of seven LSOA level domain indices, each of which measures a different aspect of deprivation (income, employment, health, education & skills, barriers to housing & services, crime and living environment.) There are also two supplementary indices (Income Deprivation Affecting Children and Income Deprivation Affecting Older People).

There are 32,482 SOAs in England and 333 SOAs in Warwickshire. Each SOA is ranked according to its relative level of deprivation based upon a score generated from a number of different indicators. Low ranks denote greater levels of relative deprivation. A ranking of 1 represents the most deprived SOA nationally and a ranking of 32,482 represents the least deprived SOA nationally. The areas are ranked either within the top 10, 20 or 30% most deprived nationally.

Summary & Key Issues:

The village of Witenas features in the Domesday Book in 1066. Until about 1850, the only access to Whitnash was through paths and lanes across surrounded cultivated fields. It is likely that this relative isolation has bequeathed to the residents a strong sense of belonging to a distinct locality. There is no marked town centre but a handful of half-timbered thatched cottages centred on St Margaret's Church mark the nucleus of the old village. The Church itself dates back to Saxon times. It became a town in 1972.

Whitnash is a small, primarily residential, town with four junior schools, a community hall, a library and information centre, a nursery, a children's centre and the Acre Close playing fields. The town has 3 shopping areas, on Coppice Road, Heathcote Road and Home Farm Crescent. Leamington Rehabilitation Hospital is also located in the area. Active community groups include Whitnash Town Council, the Whitnash Society, and the Whitnash Twinning Association, which actively maintains links with Villebon in France, and Weilerswist in Germany. Whitnash Tennis Club is located at the Sports and Social Club site, and the Leamington and County golf club is on Golf Lane in Whitnash. Whitnash has its own under-10 football team, the Whitnash Juniors. The town also has its own petanque and short mat bowls clubs. Other sports clubs in the town include angling, crib and senior football. Two separate allotment sites, at Golf Lane and Dobson Lane, are open to residents of the town.

In terms of transport, there are regular Flexibus services to Leamington Spa and the area has easy access to the M40 motorway.

Whitnash Town Council produces a quarterly magazine called the Whitnash Tymes, which is distributed free of charge to every household in the town.

The Whitnash Community Forum encourages local residents to come together to consider issues of importance to the town. Developing opportunities for older people to socialize is a key concern of the Forum, with a luncheon club and a coffee morning both springing out of discussions at the Forum. The Forum has a small pot of grant funding, which it uses to bring benefit to the community. The local Youth Club has benefitted from several Forum grants, and has been able to provide exciting opportunities to local young people to attend outward bound holidays. Community Safety is high on the priority list for the Community Forum, and significant work is undertaken in the town to reduce speeding through the Community Speedwatch scheme, staffed entirely by local volunteers who are supported by the Police.

Whitnash locality has a slightly younger population age profile compared to Warwickshire as a whole, with 18% of residents of retirement age, compared to 21% across the County. The locality also has a rich mix of different ethnic groups, 17% of the population were recorded as being of non-white British ethnic origin at the time of the 2001 Census, which ranks as the second highest proportion among the 30 localities in the County.

The Whitnash locality's unemployment rate of 1.8%, as measured by the proportion of the working age population claiming Job-Seekers Allowance, compares well against the County rate of 2.6%. The occupational profile of the working age population in the locality is fairly similar to that of the County; although there are slightly more employees within administrative and secretarial and sales and customer service roles compared to the Warwickshire average.

The total recorded crime rate in the locality is low, 29 offences per 1,000 population is the lowest across all localities in the County, and compares well with the 63 offences per 1,000 population recorded across the whole of Warwickshire. Vehicle crime offences are also the lowest in the County, as are road injuries.

The proportion of resident pupils in Whitnash who achieved 5 or more A*-C GCSE grades (including English and Maths) was slightly higher than the County average, 60% compared to 57%. The proportion of 16-18 year olds recorded as not being in formal education, employment or training was low relative to the County figure. Just 2% of young people were in this position, compared to 4.5% across Warwickshire as a whole.

The Mosaic socio-demographic classification shows that compared to the County, Whitnash has a greater representation of 'successful professionals living in suburban or semi-rural homes', 'young, well-educated city dwellers' and 'residents of isolated communities'.

Consultation findings indicate that Whitnash residents are generally satisfied with the area, 89% reported they were satisfied with their local area as a place to live, compared to 83% across Warwickshire as a whole. When asked what needs improving in the local area, 'activities for teenagers', 'road and pavement repairs' and 'affordable decent housing' were the three issues most commonly selected.

Notes:

Lower-layer Super-Output Areas (LSOAs) have been used as the primary geographical building block to aggregate data to locality level. LSOAs are the smallest geography for which we have reliable data but in a small number of cases, the boundaries of the localities split an individual LSOA. Where this occurred, data has been apportioned based upon the location of residential households using a combination of Mosaic, 2001 Census and mid-year population estimate data.

The education data used here only takes account of those children that live in Warwickshire and attend Warwickshire County Council maintained schools. It does not include those living outside the County who travel in to attend our schools. Furthermore, the full dataset only represents those children attending Local Authority maintained schools and not the full child population in Warwickshire as we do not collect data from Independent (private) schools or individual pupil data from private residential special/hospital schools or of children that are home educated.

The Blueprint project considers the impacts of social, economic, and demographic changes taking place in the County over the long term. It takes the form of a series of visual map-based presentations to show analysis for a range of existing datasets. A further set of slides then detail some of the key future issues and challenges based on projected and forecasted data analysis. These help to highlight possible future implications for the County's infrastructure and also how collectively our services are delivered across the public sector.

Analysis has been carried out at both District/Borough and Locality level. A composite Countywide picture has also been developed to show inter-relationships between the variables and the geographic spread of potential future issues. The link to the Blueprint is below:

<http://www.warwickshireobservatory.org/observatory/observatorywcc.nsf/RefDocs/KMGY-825JMS?OpenDocument>

The locality profiles refer to the 2008 Place Survey, however in 2009/10, a Partnership Place Survey was carried out although data is not broken down to locality level. The report for the 2009/10 Partnership Place survey is available from:

<http://www.warwickshireobservatory.org/observatory/observatorywcc.nsf/RefDocs/KMGY-89SL46?OpenDocument>

Super Output Area (SOA) data is available for the majority of the datasets and can be made available on request from the Observatory.
