

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

Village	Representor No.	Specific Representation Numbers	Plan Area	Representation Detail	Summary Report Detail
General - Object	Baginton Parish Council (Mr Steve Williams) [726]	49438	Object B. Category 1 and 2 Villages	BPC objects to the classification of villages generally. The Local Plan must not dictate the type of housing development to villages, but rather should take into account village desires under the Localism act and in the case of Baginton, our Parish Plan.	The Local Plan must not dictate the type of housing development to villages, but rather should take into account village desires under the Localism act and in parish plans.
	Budbrooke Parish Council (Mrs Simone Bush) [1330]	48841	(Object) Hampton Magna - Preferred Options	(See Hampton Magna entry)	Lack of understanding about the process or consultation with regard to rural areas – particularly as no sites have been identified (1). The suggestion that 850 houses need to be spread across the district in rural locations is arbitrary. The reasoning that the category 1 villages should have 100 houses is inappropriate as each has unique circumstances, there is no more need in these locations as opposed to alternative category 2 and 3 villages, with additional infrastructure these would become less isolated and more socially cohesive (2). Should refer to Parishes rather than villages to allow parishes to use local knowledge to suggest areas (5). The absence of Cubbington, Bubbenhall and Baginton as Category 1 villages seems inconsistent. Cubbington has a range of services and substantial employment opportunities compared with Budbrooke (6).

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

	Barford Residents Association (Mr Rod Scott) [5738]	46848	Object B. Category 1 and 2 Villages	The total number of houses recommended for rural locations is 830, 500 + 'about 330'. In para 7.38 the transport modelling ranged from 0 to 400 houses in rural areas - but did not consider double that amount. The effect of building houses in rural areas is to place additional multiple requirements on transport and infrastructure which will not be easy to satisfy.	The effect of building houses in rural areas is to place additional multiple requirements on transport and infrastructure which will not be easy to satisfy.
	Barford Residents Association (Mr Rod Scott) [5738]	47349	Object B. Category 1 and 2 Villages	BRA is opposed to village envelopes being changed by WDC merely to enable new developments to occur. These village envelopes have evolved over a number of years to maintain open areas and views which are crucial in maintaining the character of each village. Any development should be initiated by the village and encouraged by the village - if imposed it will not be successful.	No not agree with the need to change village envelopes which have evolved over time.
	Barford, Sherbourne and Wasperton Joint Parish Council (Mr John MURPHY) [566]	46524	Object B. Category 1 and 2 Villages	Proposals for Cat 1 villages, Barford in particular, are unrealistic and must be reduced if we are to maintain the community balance and integrity which is important to the rural villages.	Unrealistic proposals for villages – need to maintain community balance and integrity.
	Bishops Tachbrook Parish Council (Mrs Simone Bush) [182]	49873	Object B. Category 1 and 2 Villages	This is a generalised target being arbitrarily set. Each village will have a different set of problems in achieving those targets and target setting is not the way to plan. Every village or settlement, not just the villages so far selected, should be examined with each community to see how practical these targets are taking into account any Local Housing Needs	The Local Plan must not dictate the type of housing development to villages, but rather should take into account village desires under the Localism act and in parish plans.

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				Surveys.	
	Mr & Mrs Peter & Linda Bromley [1086]	50143	Object B. Category 1 and 2 Villages	Less than 10% of new housing is proposed for villages, some of which (Barford for example) would welcome more homes including low-cost housing to build-up sustainable communities with schools and facilities and meet the needs of affordable rural housing. Those that grew up in the villages and wish to remain there would then have the opportunity to do so. We would propose that at least another 1,000 could be spread around the villages and the number proposed for Warwick reduced.	Need for additional homes in villages to support sustainable communities.
	Mr & Mrs Peter & Linda Bromley [1086]	50152	Object B. Category 1 and 2 Villages	The previous Core Strategy identified several other sites with potential for housing. Local villages where there are good transport links and the potential to improve road access should be developed rather than the urban fringe development of Warwick. These areas include: - The Warwick Parkway area - Hatton - Radford Semele - Lapworth - to the west of Bishop's Tachbrook This in turn would mean much smaller developments around Milverton and Warwick.	Opportunities to concentrate growth on villages with good transport and road infrastructure.
	Mr. A. Burrows [2117]	49480	Object B. Category 1 and 2 Villages	If any small scale development is allowed in village locations, the type of housing must not be dictated by developers. The local community must be able to determine what is required for local need. Any development must	With regards to housing, the local community must be able to determine what is required for local need. Prioritise brownfield first, then areas close to infrastructure and

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				be planned in a priority order using Brown Field sites first, secondly developing areas close to existing infrastructure, and only allowing any developments in rural and Green Belt areas as a last resort.	greenbelt as a last resort.
	Court (Warwick) Ltd (Richard Hayward) [7361]	49158	Object B. Category 1 and 2 Villages	Stoneleigh should be included in the list of Category 2 Villages for a modest scale of development. The village is well located to Stoneleigh Park which is the subject of a planning application for substantial development. It is also well located to larger centres of population. The plan attached to the response form identifies a site that could accommodate circa 14 dwellings. This release of land would not adversely impact upon the underlying purposes of the Green Belt.	Stoneleigh should be included in the list of Category 2 villages for a modest scale of development without adversely impacting upon the greenbelt.
	Mr. Christopher Farr [5016]	47245	Object B. Category 1 and 2 Villages	As mentioned in objection to PO3. Significant development in the villages will unacceptably change their character. Providing the necessary infrastructure would be either too expensive or totally impossible.	Significant development in the villages will unacceptably change their character. Providing the necessary infrastructure would be either too expensive or totally impossible.
	Mr Ian Green [6789]	50128	Object B. Category 1 and 2 Villages	The idea of significant housebuilding in villages is ill-conceived and will damage the character of the villages and will result in unviable expenditure on infrastructure to accommodate this.	House building will damage the character of the villages and result in unviable infrastructure costs.
	Rachel Hargreaves [7177]	48479	Object B. Category 1 and 2 Villages	It seems unreasonable that the Council are proposing a carte blanche for villages on where the development is allocated indeed removing all protection that the Green Belt is afforded whilst	<i>Council imposes decision which removes greenbelt protection and makes preferences on where to develop further housing.</i>

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				decisions are made as to where the preference is to develop further housing.	
	Health and Safety Executive (Mr Gerry Adderley) [5393]	47856	Object B. Category 1 and 2 Villages	The Health and Safety Executive (HSE) is a statutory consultee for certain developments within the consultation distance of major hazard sites and major accident hazard pipelines. There are currently no major hazard sites in the WDC area, however there are major accident hazard pipelines in the vicinity of the villages: Radford Semele, Bishops Tachbrook, Shrewley and Leek Wooten, identified as possible areas for development. Until specific development sites around these villages have been identified, it is not possible to say whether they will lie within the consultation distance of a particular pipeline which would require HSE consultation.	Major accident hazard gas pipelines need to be noted for the villages of Radford Semele, Bishops Tachbrook, Shrewley and Leek Wooten.
	Cllr Elizabeth Higgins [1080]	50270	Object B. Category 1 and 2 Villages	Villages to the west of Warwick have marvellous infrastructure with a main rail line (Chiltern Line) to get to and fro work in big cities. Warwick Parkway station car park increases in size every 2 years and is full every weekday. The demand for quick access to major centres of population, Birmingham & London is unquenchable. Why cannot these 10,800 houses be built 100 in each and every village in Warwickshire? Then the shop, school and bus service would be viable.	Villages to the west of Warwick have marvellous infrastructure with a main rail line.
E-Mail (Duplicate Rep)	Mr Rob Lane [7119]	48340	Object B. Category 1 and 2 Villages	Considers that other villages should be included in the list of those where housing development	Other villages could be included on the list with a more even spread – particularly near key

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				will be allowed, and notes that in particular Ashow, Baginton, Bubbenhall, Hill Wootton, Offchurch, Stoneleigh, Stareton and Old Milverton are not mentioned. There are employment opportunities at Stoneleigh Park, the University of Warwick and Coventry Airport all close by so surely it makes sense to distribute new housing around the district rather than concentrate it all in a couple of areas. Any increase in road traffic would be spread far more evenly, rather than concentrated at one or two pressure points.	employment opportunities.
Paper	R J Lane [6168]	49440	Object B. Category 1 and 2 Villages	Not enough villages on the list. Ashow, Baginton, Bubbenhall, Hill Wootton, Offchurch, Stoneleigh and Stareton not mentioned and even Old Milverton. Local areas for employment growth at Stoneleigh Park, University of Warwick and Coventry Airport, so new housing should be distributed wider. Would stimulate local community life and steer away from dormitory villages for wealthier individuals. Any increase in traffic would be spread. People in Old Milverton would welcome new houses to lead to vibrant community life. Northern relief road would cross River Avon flood plain. Floods three times a year at least and wildlife corridor would be decimated.	Other villages could be includes on the list with a more even spread – particularly near key employment opportunities.
	Roger Mills [4948]	46560	Object B. Category 1 and 2 Villages	Para 7.18 makes it clear that dispersing development around the District on small/medium sites would not work - and yet that is	Dispersing development around villages will not work.

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				precisely what is proposed for many of the villages!	
	Roger Mills [4948]	46562	Object B. Category 1 and 2 Villages	The classification of villages as Category 1 or 2 appears to have been done in a purely arbitrary way without taking infrastructure limitations into account.	Classification of villages has been done in a purely arbitrary way, without considering infrastructure limitations.
	Mitchell Johnson-Marshall (P J Mitchell) [7426]	50120	Object B. Category 1 and 2 Villages (Support) B. Category 1 and 2 Villages	This policy will allow for previously developed land within the category 1 & 2 villages to accommodate a total of 850 new houses. Has the local authority identified such sites to accommodate this proposal? If so, where do they exist on previously developed land? Suggest that market housing allocations are promoted within selected villages to ensure a healthy mix of houses to suit young families through to retirement couples.	Concerns over what has been proposed and whether this is on previously developed land. Market housing allocations should be promoted to ensure a healthy mix of houses to suit young families through to retirement couples.
	John Murphy [7446]	49710	Object B. Category 1 and 2 Villages	Significant increases for many of the villages. Suggest that the total category one village numbers are significantly reduced and housing numbers allocated on a pro-rata basis depending upon the current housing / population numbers in the villages. Considerable attention should be paid to the Sustainability Appraisal scores, which indicate Barford as the third worst. Attention also needs to be paid to the capacity of the local school in Barford to accommodate additional pupils.	Too many houses proposed for the villages – suggest numbers are calculated on a pro-rata basis. Sustainability scores indicate some village locations are very poor sustainability scores.
	Mr Rod Scott [4821]	46649	Object B. Category 1 and 2 Villages	Significant growth in villages will cause strain to infrastructure such as employment, transport and schools which will vary from village	Growth will cause a strain on infrastructure, which will vary from location to location – an arbitrary category distinction is

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				to village. An arbitrary distinction of category 1 and category 2 is too simplistic a measure and growth in the villages should be assessed individually. Consideration should be given to employment facilities within the villages and public transport to reduce car journeys and consequent pollution. Any growth in villages should be phased over the duration of the plan so that the new housing can be gradually assimilated into the village community.	too simplistic a measure and growth should be assessed individually. Any growth in the villages should be phased.
	Dr Paul and Alison Sutcliffe [4945]	48580	Object B. Category 1 and 2 Villages	Objects to expanding housing in smaller villages like Hampton Magna, Hatton Park and Shrewley which would significantly impact on the quality of life for existing residents. These small communities are already overburdened by through traffic and schools are at capacity. The Council should work with parishes and residents before considering any expansion in these areas. Any housing that goes ahead should be at a standard inkeeping with existing properties.	Object to expanding housing in smaller villages (Hampton Magna, Hatton park and Shrewley) as it would reduce the quality of life of existing residents already suffering with traffic and overburdened infrastructure. Council should work with parishes and residents on any housing proposals and housing should be in-keeping with existing properties.
	Mr William Tansey [5601]	47739	Object B. Category 1 and 2 Villages	Smaller villages around Leamington are commuter dormitories due to lack of infrastructure and withdrawal of services. Plan will set in motion their complete assimilation into greater urban area. Controlled rural development needed to arrest decline of rural communities.	Smaller villages around Leamington are commuter dormitories and the plan will set in motion assimilation into the greater urban area. Controlled rural development is required to arrest the decline of rural communities.
	Mr Neil Turfrey [5547]	46249	Object B. Category 1 and 2 Villages	It makes far more sense to start again so to speak, in a location where you can get the	Makes more sense to start again with locations where you can get the infrastructure right from the

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				infrastructure right from the beginning.	beginning.
	Marrons (Mr Richard Dunnett) [7503] Respondent: Mr Edward Walpole-Brown [7504]	50030	Object B. Category 1 and 2 Villages	Based upon our previous representation (suggesting the requirement for 10,903 dwellings) and the Council's suggestion of 10% housing allocation to the villages, this would mean that 1090 plots would need to be distributed amongst the category 1 and 2 villages. Noting the proposed 60:40 split between category 1 and 2 villages, this would leave 650 plots for category 1 villages and 440 plots for category 2 villages. The range of housing to be provided should be amended.	Requires a higher level of housing for the villages based upon 10% of 10,903 units (suggested additional housing requirement).
	Savills (Mr Michael Davies) [7340]	49098	(Object) Barford - Preferred Options	Although Taylor Wimpey supports the proposal for category 1 villages, Barford may be able to accommodate dwelling growth in excess of 100 units. We suggest that the council sets out a dwelling range with minimum and maximum numbers that might be acceptable for Barford. Furthermore if some villages (category 1 and 2) are unable to meet broad targets set then other villages may need to make up the shortfall. An assessment of likely housing capacity in each village is required to understand what the housing capacity parameter should be.	An assessment of likely housing capacity in each village is required to understand what the housing capacity parameter should be.
	Mr Rod Scott [4821]	46650	(Object) Barford - Preferred Options	Allocation of new housing in category 1 villages is not in proportion to their existing size. Recent history of growth of housing in each village is not taken	Allocation of new housing in category 1 villages is not in proportion to size and does not take into account history of recent growth.

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				into consideration. The growth of housing in small villages should be phased over the full period of the plan.	The growth of housing in small villages should be phased over the full period of the plan.
	Sue Shirley [7157]	48417	(Object) Hampton Magna - Preferred Options	(See Hampton Magna Section)	Scheme looks like it has been put together to make numbers add up. Why is Cubbington classed as a type 2 village?
General - Support	Tetlow King Planning (Meghan Rossiter) [1563]	48357	(Support) B. Category 1 and 2 Villages	Support establishment of new village boundaries to enable development to come forward at rural villages. In discussion with Parish Councils, Council should also ensure consultation with local landowners and developers, including HARPs, to support development in most sustainable locations. Support removal of land within village envelopes from Green Belt.	Support establishment of new village and green belt boundaries to enable development to come forward – consultation should also include landowners and developers.
	Stansgate Planning LLP (Miranda Rogers) [79] Respondent: Sir Thomas White Charity [6449]	49760	(Support) B. Category 1 and 2 Villages	Supports the policy in directing new housing to sustainable villages on the basis of a settlement hierarchy. Agree that it is appropriate to alter Green Belt boundaries where the more sustainable settlements are tightly constrained by the Green Belt to allow development to take place. The boundary changes should be part of the current Local Plan and not any subsequent site allocations DPD.	Supports the policy in directing new housing to sustainable villages on the basis of a settlement hierarchy. Agree on the need to alter green belt as part of the local plan not any subsequent site allocations DPD.
	RPS Planning & Development (Mr Nick Laister) [4578]	50089	(Support) B. Category 1 and 2 Villages	The Council's approach to the Distribution of Sites for Housing through policy PO4 is broadly welcomed in principle, because it envisages new housing in rural villages as well as further development in the main settlements.	Broadly support approach to housing distribution as it envisages new housing in the villages.

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

	Lt Colonel Ray Oakley [5919]	48185	(Support) B. Category 1 and 2 Villages	Category 1. I support this proposal but would suggest that the number of houses proposed is made more flexible, say 500-800, with the actual number and location dependent on consultations with the parish councils. From a feasibility study carried out some years ago, relating to Bishops Tachbrook, one of the three villages identified, I recall that there were a wide variety of housing needs in that village, where young and old people felt forced to move away from the village, where they had always lived, because of the shortage of appropriate and affordable housing.	With regard to category 1, support that the number of houses proposed is made more flexible – 500-800 with the actual number and location dependent on consultations.
	Philip and Barbara Lennon [1887]	49523	(Support) B. Category 1 and 2 Villages	Approve of WDC working with Parish Councils to define village boundaries and agree that where land is in green belt, it will be removed to enable development. Suggest phased building timetable for each village to ease residents fears.	Agree with need to work with parish councils on re-defining village boundaries to enable development – phased building timetable required to ease residents fear.
	Howkins & Harrison (Mr John Clarke) [4520] (unconfirmed) Respondent: Howkins & Harrison (Mr John Clarke) [4520]	46971	(Support) B. Category 1 and 2 Villages	Support the principle of residential development in Category 1 and 2 villages.	Support the principle of residential development in Category 1 and 2 villages.
	Mr Malcolm Glenn [5521]	47132	(Support) B. Category 1 and 2 Villages	The nominal figure of 100 new dwellings per village is assumed to be a guide since each village is unique in character. Some residents might think it unwelcome, but it could so easily be regarded as a wonderful opportunity to explore what benefits this could bring to the village. Questions should be asked of land owners, developers,	Good opportunity to explore what benefits housing development could bring to each village.

Appendix 1 – Consultation Feedback – Preferred Options Document (Partial Review)

				architects and landscapers, how best to accommodate this within one or more sites - seek to determine what each of these professionals can do for the village rather than allow them to treat it as just another job of building a quantity of houses.	
	dr eirian curzon [4843]	47425	(Support) B. Category 1 and 2 Villages -	I support 'organic' and limited growth of village populations as long as the village character is not overwhelmed. Missed opportunities to add homes to several close villages, e.g. Bubbenhall and Baddesly Clinton.	Support organic growth of villages as long as the village character is not overwhelmed. Additional housing opportunities in Bibbenhall and Baddesly Clinton.
	Mr Ian Clarke [1544]	46348	(Support) B. Category 1 and 2 Villages - Preferred Options	Seems a sensible approach providing no Green Belt land outside the existing village envelope is taken.	Sensible approach provided no greenbelt land is taken outside the existing village envelope.
	Peter and Philippa Wilson [4801]	48768	(Support) B. Category 1 and 2 Villages - Preferred Options	For some limited growth in villages.	For some limited growth in villages.
	Savills (L&P) Ltd (Jason Hill) [7237] (unconfirmed) Respondent: Landowners - Hampton Magna [7235]	48691	(Support) Hampton Magna - Preferred Options	Support Hampton Magna as a Category 1 village, but believe the village has the capacity to provide growth in excess of 100 homes. Suggest a capacity of assessment of each village should be undertaken	Suggest a capacity of assessment of each village should be undertaken

Leek Wootton	381	57	0	+1	+3	0	+1	+5	25	82	70-90

Notes

Service Tipping Points Considerations – primary school capacity / scope to support local shops and facilities

Role and Character Considerations - historic role

Suitable sites Considerations – Quantity of SHLAA sites / outline site capacities

Environmental Impact Considerations – greenbelt / habitat and ecology / landscape impact

Settlement Vision Considerations – neighbourhood planning / parish vision
