

Matter 7A Written Statement – H44 Land North of Milverton – Nigel Greasley (13869)

I strongly object to the proposal to develop old milverton green belt land as an overspill from Coventry. This site should never be considered as the alternative sites closer to coventry would make more sense and be less costly. The road system close to this site is not intended for the amount of new traffic that would come from this site and public transport would have to be increased to cope with 1350 new houses which are proposed. As for the building of a new railway station, it seems that the planners have forgotten about the new station already under construction in Kenilworth, along with the fact that this railway line is only a single track and if it goes ahead this single railway will have 4 stations in a 9 mile section. The planners should also look at the feasibility of a park and ride because the one at Stratford upon Avon is so underused and the parkway station there is running at a loss.

Regards Nigel Greasley.
