Appendix 2 - Appraisal results – strategic sites

1 Introduction

In June 2013, BNP Paribas Real Estate issued a 'Community Infrastructure Levy: Viability Study' to Warwick District Council ('the Council'). The Council used this report to inform its Preliminary Draft Charging Schedule ('PDCS') which was published for consultation between 14 June and 29 July 2013.

1.1 The purposes of this report

Fifteen months have elapsed since the close of the consultation on the PDCS and the Council have commissioned BNP Paribas Real Estate to update the appraisals underpinning the June 2013 report. This Addendum Report sets out the results of this exercise and should be read in conjunction with the June 2013 Viability Study.

1.2 Market changes since publication of the June 2013 report

Since undertaking the research underpinning our June 2013 report, there have been significant changes in the housing market, with prices increasing nationally by 10% to September 2014. The District has also seen growth in the levels of new development over the period, and values achieved on these schemes indicate significant growth in sales values in comparison to values assumed in our June 2013 report. However, the period February 2013 to November 2014 has also seen an increase in build cost inflation. The RICS 'Building Cost Information Service' data for Warwick indicates that costs have increased by 14.9% over this period. This increase in costs will clearly have an adverse impact on development viability, partially offsetting the improvement in sales values.

1.3 Methodology

We have adopted the same methodology in this Addendum Report as in our main June 2013 report. This is set out in detail in Section 3 of that report. We have made changes to some of the inputs to the appraisals that were set out in Section 4 of the June 2013 report. These changes reflect movements in values and costs over the intervening period, as well as some additional sensitivity analyses on Section 106 obligations.

1.4 The PDCS CIL rates

The Council's PDCS proposes a range of CIL rates for residential development with four zones, shown in the map at Appendix A of the PDCS. The four residential zones cover the following four areas:

- Zone A - Warwick; the south-east area of Leamington Spa and Radford Semple; and Lillington;
- Zone B – Leamington Spa, land to the south of Leamington Spa, Cubbington and Bishop's Tachbrook;
- Zone C – Kenilworth and surrounding areas;
- Zone D – rural areas outside the zones above.

The zones for retail development are 'Prime Leamington Spa' and all other parts of the District. Other rates for convenience based supermarkets and student housing apply across the District as a whole.

For ease of reference, Table 1.1.1 summarises the rates proposed by the Council in its PDCS.

Table 1.1.1: PDCS CIL rates (per square metre)

Type of development	Zone A	Zone B	Zone C	Zone D
Residential	£50	£170	£120	£180
Strategic residential	£30	£90	£70	£110
Offices	Nil			
Retail development – prime Leamington Spa	£65			
Convenience based supermarkets ¹ and superstores ² and retail parks ²	£75			
Retail – other areas	Nil			
Industrial and warehousing	Nil			
Hotel	£80			
Student accommodation	£80			

¹ Superstores/supermarkets are shopping destinations in their own right where weekly food shopping needs are met and which can also include non-food floorspace as part of the overall mix of the unit.

² Retail warehouses are large stores specialising in the sale of household goods (such as carpets, furniture and electrical goods), DIY items and other ranges of goods, catering for mainly car-borne customers.

2 Revisions to residential appraisal inputs

In this section, we summarise the revisions we have made to our appraisal inputs in light of changes in market conditions and other relevant factors since the June 2013 report.

2.1.1 Residential sales values

In our June 2013 report, we adopted the sales values shown in Table 2.1.1, which we based on our research on the various housing sub-markets in the District. This exercise indicated that values ranged from £214 per square foot (£2,307 per square metre) to £295 per square foot (£3,180 per square metre).

Table 2.1.1: Sales values in the June 2013 report

Area	Average values £s per sq m	Average values £s per sq ft
Warwick and East Leamington Spa	£2,307	£214
Most of Leamington Spa	£2,981	£277
Kenilworth	£2,691	£250
Rural areas (higher value – Rowington, Leek Wootton, Ashow, Hunningham, Cubbington, Norton Lindsey, Shrewley, Bishop's Tachbrook)	£3,180	£295
Rural areas (lower values)	£2,449	£228

Land Registry data (covering all sales, including second hand properties) indicates that values across the County of Warwickshire have increased by circa 9%.

We have reviewed marketing prices for new build developments across the District, which indicate the following values (after allowing for a 5% deduction for negotiations on price):

- Finham Court, Kenilworth (retirement living): average of £347 per square foot;
- Wilton Court, Kenilworth (retirement living): average of £356 per square foot;
- Herbert Bond Drive, Kenilworth: average of £273 per square foot;
- Long Ground, Lowes Lane, Wellesbourne³: average of £299 per square foot;
- Peelers Gate, Wellesbourne: average of £258 per square foot;
- Audley Binswood Avenue, Leamington Spa (retirement living): average of £447 per square foot;
- Queensway Court, Leamington Spa (retirement living): average of £324 per square foot

³ Wellesbourne is located just outside the District boundary, but the new build developments in this settlement provide a good indication of values achievable in the rural areas to the south of Warwick.

- Warwick Gates, Gallagher Way, Warwick: average of £328 per square foot;
- Chase Meadows, Warwick: average of £264 per square foot;
- Beamtont Meadowow, Warwick: average of £265 per square foot;

Rightmove market analysis indicates that achieved values in the District have increased by an average of 15% between March 2013 and July 2014 (the most recently available analysis by Rightmove). This would therefore indicate that the values in our appraisals should be increased as follows:

Table 2.1.2: Revised sales values

Area	Average values £s per sq m (£s per sq ft) – June 2013 report	Revised sales values £s per sq m (£s per sq ft) – November 2013
Warwick and East Leamington Spa	£2,307 (£214)	£2,630 (£244)
Most of Leamington Spa	£2,981 (£277)	£3,398 (£316)
Kenilworth	£2,691 (£250)	£3,068 (£285)
Rural areas (higher value – Rowington, Leek Wootton, Ashow, Hunningham, Cubbington, Norton Lindsey, Shrewley, Bishop's Tachbrook)	£3,180 (£295)	£3,625 (£337)
Rural areas (lower values)	£2,449 (£228)	£2,792 (£259)

2.1.2 Affordable housing tenure and values

There has been no change to the Council's policy position or approach to rent setting for affordable rent units since our June 2013 report. Consequently, the values for affordable rent units assumed remain unchanged.

Shared ownership values are linked to market values, so have increased in line with the changes set out in the preceding section.

2.1.3 Residential build costs

In the 2013 report, we adopted the following BCIS mean average costs:

- Houses: 'Estate Housing – generally' which were £831 per square metre. On 6 November 2014, the corresponding BCIS cost had increased to £955 per square metre.
- Flats: 'Flats – generally' which were £953 have increased to £1,102 per square metre.

In both cases, we have added allowances for external works (15%) and 6% for Code for Sustainable Homes level 4. For flatted developments, we have assumed a gross to net ratio of 85% (unchanged).

Table 2.1.3: Revised build costs

Type	BCIS base – quarter 2 2012	Base cost	External works and CSH	All-in cost (gross)	All-in cost (net)
Houses	Estate housing – generally	£955	£143	£1,098	£1,098
Flats	Flats – generally	£1,102	£165	£1,267	£1,491

2.1.4 Section 278 and Section 106 costs

The Council has supplied information on the total Section 106 ‘package’ recently negotiated on five major strategic sites, as follows:

- Lower Heathcote Farm
- Harbury Gardens
- Woodside Farm
- Land north of Harbury Gardens
- EWC, West of Europa Way

The gross amount of financial contributions averages £13,143 per unit (across all tenures). Although it is likely that some of the contributions secured on these sites would be scaled back after CIL is adopted, we have added the full amount to our appraisals.

3 Appraisal results with updated inputs

As CIL is intended to operate as a fixed charge, the Council will need to consider the impact on two key factors. Firstly, the need to strike a balance between maximising revenue to invest in infrastructure on the one hand and the need to minimise the impact upon development viability on the other. Secondly, as CIL will effectively take a ‘top-slice’ of development value, there is also a balance to be struck between infrastructure funding and affordable housing provision. This balance is not new – clearly under the current arrangements with regards to Section 106 obligations, schemes generate a finite amount of value and every pound taken through Section 106 is a pound less for affordable housing.

In assessing the results, it is important to clearly distinguish between two scenarios; namely, schemes that are unviable regardless of the level of CIL (including a nil rate) and schemes that are viable prior to the imposition of CIL at certain levels. If a scheme is unviable before CIL is levied, it is unlikely to come forward and CIL would not be a factor that comes into play in the developer’s/landowner’s decision making. We have therefore disregarded the ‘unviable’ schemes in recommending an appropriate level of CIL. The unviable schemes will only become viable following a degree of real house price inflation, or in the event that the Council agrees to a lower level of affordable housing for particular sites in the short term.

3.1 Maximum viable rates of CIL for residential development

As noted in above, where a scheme is unviable the imposition of CIL at a zero level will not make the scheme viable. Other factors (i.e. sales values, build costs or benchmark land values) would need to change to make the scheme viable. For the purposes of establishing a maximum viable rate of CIL, we have had regard to the development scenarios that are currently viable and that might, therefore, be affected by a CIL requirement. All the results summarised below assume, firstly, that current affordable housing requirements are met in full. Sensitivity analyses which adopt reduced levels of affordable housing are also provided. This shows the relationship between CIL and affordable housing and the amounts that could be secured by changing the other requirement.

Tables 3.1.1 to 3.1.9 summarise the results of our residential appraisals of smaller sites (the full results are attached as Appendix 1). For each development typology, the tables show the highest CIL rate (within the testing range of £0 to £250 per square metre) that is viable against each of the four benchmark land values.

Site typologies 1, 3, 4, 7 and 8 are located on greenfield sites, while site typologies 2, 5, 6 and 9 are developments in urban areas. The relevant parts of the tables are shaded either green or brown to focus on the results that are most pertinent for each particular development typology. For example, for Site typology 1, BLV 3 and BLV 4 are shaded green, as these are the most relevant benchmarks for greenfield sites.

It is also important to note that Site typology 1 is a 4 unit scheme that falls below the Council’s affordable housing threshold of 5 units in a rural area. Similarly, Site typology 2 is an 8 unit scheme that falls below the 10 unit threshold for urban areas. Although the tables show the results for a range of affordable housing percentages (up to 40%), the current policy position does not require any contribution from these types of sites. The relevant results for site types 1 and 2 is therefore the ‘0%’ affordable housing column.

3.2 Strategic sites

Tables 3.2.1 to 3.2.5 summarise the results from our appraisals of five strategic sites in the District, located adjacent to the three main settlements and neighbouring Coventry. The results are displayed in the same format as the smaller sites, but with all five strategic sites being greenfield, benchmark land values 3 and 4 are the most relevant when considering a rate of CIL for these types of development.

As noted in the June 2013 report, the strategic sites carry higher costs than other developments, most notably on-site infrastructure (utilities, drainage, site roads etc) and on-site community infrastructure (schools, community facilities etc). For each unit, our appraisals assume a £10,000 allowance for on-site infrastructure (i.e. roads, utilities etc) and a further £13,140 to contribute towards on-site community infrastructure through Section 106 (increased from £10,000 in the June 2013 report). Other relevant factors to consider are the long build out rate, which means that developers are carrying costs for a much longer period of time than is the case with small schemes. These factors combine to make these types of development more challenging, at least in principle.

Although each of the five strategic sites is clearly located adjacent to a particular settlement, we have also appraised them using sales values from each of the main value areas (i.e. Warwick, Leamington Spa, Kenilworth, higher value rural area and lower value rural area). As well as reflecting the viability conditions in their 'actual' area, the sites also provide an indication of the viability of a development of those characteristics in the other areas. This helps give more depth to the results.

As noted in paragraphs 6.13 and 6.14 of the June 2013 report, sales values are influenced by the main settlement the strategic sites are joined to, but other location factors come into play.

4 Conclusions and recommendations

This addendum report tests the impact of changes in sales values and build costs on the viability of residential developments in the District and their ability to make contributions towards infrastructure requirements through CIL. On the strategic sites, we have tested CIL rates alongside on-going contributions to infrastructure through Section 106 (either on-site provision or financial contributions).

The updated appraisals show a marginal improvement in viability in comparison to the results in the June 2013 Viability Study. However, this improvement is not of sufficient magnitude in our opinion to warrant any changes to the CIL rates proposed by the Council in its PDSCS. We therefore recommend that the currently proposed CIL charging schedule is carried forward to the Draft Charging Schedule consultation.
