

## Exam 185

### **Main Modification MM54**

In the compilation and execution of the Main Modifications consultation process Warwick District Council inadvertently misinterpreted the Inspector's requirements with regard to park and ride provision north of Leamington Spa. In doing so, the Council assumed that a park and ride area of search should be included in the Local Plan north of Leamington on the land previously to be allocated for Housing (H44).

Consequently the Council issued a consultation document promoting a change in the Proposals Map that incorrectly incorporated an area of search for a park and ride facility at this particular location.

The Inspector is aware of this situation and the Council has recently confirmed with him that it is now in full agreement with his suggested modification that itemised two areas of search for park and ride north of Leamington that are not on the land previously allocated as H44.

The District Council is intending to put a notice on its website to inform the public of this situation and will be contacting all relevant respondents to MM54 to ensure that they are informed of this corrected Council position and also to reassure them that the Council did not knowingly intend to promote a park and ride at this location contrary to the recommendations of the Planning Inspector.
