# 1. Introduction

- What is the Local Validation List?

The Local Validation List sets out the information that Warwick District Council will require to be able to register, assess and determine planning applications. The amount of information required will vary depending on the type, scale and location of the proposed development including any site-specific constraints. Not all the local information requirements will apply to every planning application. The District Council will only ask for what is required to determine the planning application.

The Growth and Infrastructure Act (2013) requires that local information requirements must be:

- Reasonable, having regard, in particular to the nature and scale of the proposed development; and
- A matter that it is reasonable to think will be a material consideration in the determination of the application

This reflects the Town and Country Planning (Development Management Procedure) Order 2015 and Paragraph 193 of the National Planning Policy Framework (2012).

Each local information requirement is considered to meet the above statutory tests.

- Validation Requirements

The information required to make a valid application consists of mandatory national information and local information requirements. Warwick District Council will not be able to process an application unless all the appropriate information listed has been provided.

In relation to the local requirements, criteria are included, wherever possible, to indicate when local requirements will be triggered. Much, however, is dependent on the location of development, its size, scale and nature/character and/or its impact on local amenities and the environment and the requirements are not prescriptive in every case. Links to other sources of information and guidance are provided to assist in determining when additional information is required.

Clearly there are some circumstances where applicants will need to discuss the local requirements with the District Council before submitting an application. Applicants are strongly encouraged to do this because failure to provide the information specified under the national and local requirements will make a planning application invalid and will delay the processing of the application until the information is supplied.

Where an application is considered to be invalid, the District Council will write to explain what information is required and indicate a time period within which this must be provided. Where an application is initially considered to be valid, but it is later discovered to be invalid, it will be put on hold until such time as the required information is submitted. On receipt of the information the determination period for the application will be restarted.

Once a planning application is submitted and all the necessary information has been provided, the application will be validated, and the public will be consulted for 21 days. If documents submitted are revised during or after the consultation period; it is likely that there will be a need to re-consult.

This document has been prepared by the District Council to help applicants understand the type and extent of information required to be submitted with planning applications to ensure that they can be made valid, together with any additional information that will likely to be needed for the determination of application.

## 2. National Validation Requirements:

### Application Form:

There are various different application forms for different types of development which can be found [here](#). The application form also includes Ownership Certificates and Agricultural Land Declarations which must be completed. More information about certificates and the application form can be found [here](#) and in Section 4.

### Fees:

The fees required for various applications, and any exceptions which may be applicable, are set out [here](#). A fee calculator is available [here](#). You can pay your fee in the following ways: Through the Planning Portal when submitting an application; BACS; and Online [here](#).

### Design and Access Statement:

A Design and Access Statement is required in the following circumstances:

- Development defined as 'major development'<sup>1</sup>
- Applications for Listed Building Consent
- Development in a designated area<sup>2</sup> consisting of:
  - The provision of one or more dwellings
  - The provision of buildings where the floorspace created is 100sq m or more

More information on how to write a Design and Access statement can be found [here](#).

Design and Access Statements submitted with applications for listed building consent should explain the design principles and concepts that have been applied to the works and how those design principles and concepts take account of the special architectural or historic importance of the building, the particular physical features of the building that justify its designation as a listed building and the building's setting. Where external alterations are proposed, it should also explain how issues relating to access to the building have been dealt with. These requirements are found in regulation 3A of the Planning (Listed Buildings and Conservation Areas) Regulations 1990.

### Plans:

1. Site Location Plan. Must be based on an up-to-date OS map (please ensure you have permission to use the map). A scale of 1:1250 should be used and the map should show the site and at least two named roads. You can purchase a site location plan [here](#). The development site should be edged in red with any other land close to or adjoining the site within the same ownership edged in blue. The red line should include all land necessary to carry out the development (e.g. access to the site up to the adopted highway, landscaping, car parking and open areas).
2. Site/Block Plan. Showing the existing and proposed site at a scale of 1:200 or 1:500.

---

<sup>1</sup> For a definition of Major Development, please refer to Section 4.

<sup>2</sup> A designated area means a Conservation Area or property appearing on the World Heritage List.

### 3. Local Validation Requirements:

The documents listed below will be required to validate an application. The level of detail varies depending on the scale and type of development.

In order for the Council to determine your application as quickly as possible, you will need to provide the appropriate information as part of the application submission. Failure to supply any of the below will result in the application being invalidated and will delay the assessment process.

The list below sets out what will be required and when it will be required:

The SPD establishes the principle of Warwick District as an emission reduction area and requires developers to use reasonable endeavours to minimise emissions and, where necessary, offset the impact of development on the environment.</p> <p>The SPD identifies the circumstances where detailed assessments and/ or low emission strategies will be required as part of planning applications. It also provides guidance on measures that can be implemented to mitigate the potentially harmful impacts of new development on air quality in the district, with a focus on incorporation of mitigation at design stage.</p> |
| <p><b>4. Archaeological Assessment</b></p> <p>Policy HE4: Archaeology</p>  | <p><b>All applications where the proposed development:</b></p> <ul style="list-style-type: none"> <li>• <b>lies within, or adjacent to, a Scheduled Monument;</b></li> <li>• <b>is associated with a Listed Building;</b></li> <li>• <b>is located within an area included in the Register of Parks and Gardens of special historic interest in England or The English Heritage Register of Historic Battlefields, or</b></li> <li>• <b>the proposed development site is larger than 0.2ha in area.</b></li> </ul>   |

### 3. Recommended Additional Documents:

The following documents are not required for an application to be validated but may be required during the course of the assessment. If these are not submitted in time then it may lead to delays or a refusal. The documentation listed below may also be included to reduce the need for pre-commencement conditions, which will save time and money moving forward. Therefore, it is strongly suggested that if any of these are relevant to an application that they are submitted at the earliest opportunity and ideally as part of the initial submission.

## 4. Additional guidance and advice on documents

This section contains helpful information regarding the planning process.

### 4.1 Types of development:

Planning applications are split into four different types. The formal definitions can be seen [here](#).

Briefly, applications are split into:

1. Major applications:

- a. Applications relating to minerals/waste
- b. Applications where the number of dwellings provided is 10 or more
- c. The provision of a building where the floorspace created is 1,000sq m or more
- d. Development carried out on a site of 1 hectare or more

N.B. an application for one dwelling over 1,000sq m in floorspace would not be considered a major.

2. Minor applications:

- a. All applications for new dwellings/buildings (not including extensions to dwellings) which do not fall into the major applications

3. Householders:

- a. Applications for extensions to dwellings
- b. Applications for new buildings within the curtilage of a dwellinghouse which are not new dwellings or commercial buildings

4. Other:

- a. All other types of application not mentioned above (including prior notifications, changes of use and tree applications)

5. Listed Building Consent

- a. All applications for listed building consent.

### 4.2 Ownership Certificates:

- Certificate A – Sole Ownership and no agricultural tenants
  - This should only be completed if the applicant is the sole owner of the land to which the application relates and there are no agricultural tenants. This involves signing Certificate A on the application form and nothing else.
- Certificate B – Shared Ownership (All other owners/agricultural tenants known)
  - This should be completed if the applicant is not the sole owner, or if there are agricultural tenants and the applicant knows the names and addresses of all the other owners and/or agricultural tenants. The notice, which can be found [here](#), must be served on all owners/tenants and Certificate B signed on the application form.
- Certificate C – Shared Ownership (Some other owners/agricultural tenants known)
  - This should be completed if the applicant does not own all of the land to which the application relates and does not know the name and address of all of the owners and/or agricultural tenants. The notice, which can be found [here](#), must be served on all owners/tenants, an [advert](#) placed in the local newspaper and Certificate C signed on the application form.
- Certificate D – Shared Ownership (None of the other owners/agricultural tenants known)
  - This should be completed if the applicant does not own all of the land to which the application relates and does not know the names and addresses of any of the owners

and/or agricultural tenants. An [advert](#) must be placed in the local newspaper and Certificate D signed on the application form.

An 'owner' is anyone with a freehold interest, or leasehold interest the unexpired term of which is not less than 7 years. In the case of development consisting of the winning or working of minerals, a person entitled to an interest in a mineral in the land is also an owner.

An 'agricultural tenant' is a tenant of an agricultural holding, any part of which is comprised in the land to which the application relates.

Any hard copy certificate submitted with the standard application form must be signed by hand. For any electronically submitted certificate, a typed signature of the applicant's name is acceptable. Ownership certificates must also be completed for applications for listed building consent, although no agricultural declaration is required.

## **5. Legal Background:**

The National Planning Policy Framework states at Paragraph 193 that:

*"Local planning authorities should publish a list of their information requirements for applications, which should be proportionate to the nature and scale of development proposals and reviewed on a frequent basis. Local planning authorities should only request supporting information that is relevant, necessary and material to the application in question."*

The need for a Local List is set out in the following legislation:

*The Town and Country Planning (Development Management Procedure) (England) Order 2015*  
*Growth and Infrastructure Act 2013*
